DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 2, 3, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,423,907, granted to Haba et al. (hereafter Haba).

Haba discloses, referring to figure 16, a circuit board comprising, a dielectric substrate (322) a grounding surface (327) formed on one surface of the dielectric substrate, and transmission lines (324, only one shown, a plurality referred to) formed on one surface of the dielectric substrate, wherein a portion of each of the lines is isolated from the upper surface of the substrate to reduce effective permittivity between the lines and the grounding surface and reduce dielectric loss, and further comprising a plurality of dielectric supporters (341) for supporting the transmission lines, between the substrates and each of the lines in order to isolate the lines a predetermined interval apart from the upper surface of the substrate [claim 2], further comprising a pad (330) at one end of each of the lines [claim 3], wherein each of the plurality of dielectric

supporters is formed of a polymer to reduce electrical loss (see col. 11, lines 20-50) [claim 22].

Response to Arguments

Applicant's arguments with respect to claims 2, 3, and 22 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 6-8, 9 and 23 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 6 and 9 state the limitation "a cap which covers the transmission lines, one end of the cap being grounded to the grounding surface". Although caps, covering transmission lines and being grounded to a common ground is known in the art, one skilled in the art would not be motivated to provide such a cap on the invention of Haba as it is a critical feature of that invention that the lines be uncovered to allow for inspection and manipulation of the same. Therefore, it is deemed that this limitation, in conjunction with the other claimed limitations was neither found to be disclosed in, nor suggested by the prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,665,525 Pienimaa,

US 5,677,515 Selk et al..

Applicant's amendment, specifically the addition of the limitation that the spacers be dielectric, necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
